The record and the response

Agency allegation. The saved graphic describes personal database searches involving a 17-year-old and her family, and repeated visits to her workplace. These are the agency's allegations. [P1]

Charges announced. One count of unauthorized computer or electronic-device access and one count of official misconduct were announced. These are charges, not findings of guilt. [P1]

The allegations remain attributed to the sheriff's office. An arrest or charge is not a conviction.
